

## Project Manager – Software Delivery

### Description

The primary objective is to successfully deliver specific projects to customers, on time, to budget and quality through effective resource optimisation and the application of robust project and programme management techniques. The role involves:

1. Managing projects and programmes of work in the UK and globally
2. Delivering projects such as visualisation software, CAVEs, Domes and theme park rides

### Responsibilities

#### Project Management

1. Delivery of Industrial and Entertainment projects to agreed success criteria
2. Ensuring the use of best practice within the project
3. Establishing and agreeing baseline project scope, budget and timescales
4. Identifying and managing project RAID criteria
5. Keeping up to date costings sheets
6. Identifying and managing dependencies which may affect the success of the project, including 3rd party activities
7. Assigning, controlling, leading and motivating all project resources
8. Managing sponsor and other stakeholder expectations through regular reporting and communication
9. Managing resources, equipment, and the procurement of items for projects
10. Maintaining an effective project audit trail.
11. Maintaining the highest standards of health and safety at all times

#### People Management:

1. Assembling and matrix managing a project team which has the right mix of skills to deliver the project
2. Planning and managing the deployment of resources to meet project milestones
3. Setting achievable objectives and taking responsibility for making decisions and for providing constructive feedback
4. Communicating difficult or sensitive information tactfully

#### Financial Management:

1. Managing projects to budget and producing budget reports for work done and forecasts for future costs
2. Reviewing project profitability and margin performance
3. Assuring project legal documents are completed and signed
